DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a polymer coating having plural layer like areas, at least one of which contains a property changing component. Classified in class 428, subclass 411.1

Group II, claim(s) 6-14, drawn to a polymer coating containing an additive that contains magnetizable particles, classified in class 426, subclass 694B.

Group III, claim(s) 15-32, drawn to a process for producing a coating, classified in class 427, subclass 487⁺.

Group IV, claim(s) 33-44, drawn to a device for producing a polymer coating, wherein the device has a feed device for adding a property changing component to the polymer, classified in class 118.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-V all share the same corresponding "special technical feature" in that each group requires the addition of a property changing component to a polymer material. However, this special technical feature does not make a contribution over the prior art. US patent to 5776596 to Yamazaki et al. clearly describes a magnetic recording medium that comprises a polymer matrix, magnetic particles, and a lubricant (equivalent to applicants claimed

Art Unit: 1773

"property-changing" component) (see column 4, lines 4-22). Accordingly, the special technical feature is lacks novelty over the prior art.

3. A telephone call was made to Dan Drexler on 02/21/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nikolas J. Uhler whose telephone number is 703-305-0179. The examiner can normally be reached on Mon-Fri 7:30 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Thibodeau can be reached on 703-308-2367. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.
